

Qorta: Your All-In-One Driver Risk Solution

Manually pulling MVRs is a risky strategy. As soon as it's pulled, you're once again in the dark until the next scheduled pull. And if you're pulling your MVRs annually, you won't have insight into your drivers' behavior for another 364 days. How will you know if intervention is necessary to remediate poor driving behavior before a claim occurs?

With our comprehensive driver risk management solution, Qorta, you can leverage continuous MVR monitoring and driver training to effectively mitigate your company's risk – all within a single platform.

The Power of MVR Monitoring and Driver Training

CONTINUOUSLY MONITOR YOUR DRIVERS

Qorta eliminates the dangerous waiting game that results from annual MVR pulls. Get automatic alerts any time your drivers receive major and minor violations – whether they're on or off the clock when the incident occurs. Qorta also provides updates on suspensions, expirations and other negative driver activity.

USE VIOLATION ALERTS TO PREVENT FUTURE CRASHES

Our recent study identified which violations increase the probability of a claim within the next year. If your driver receives a violation for failing to signal a lane change, the probability of that driver causing a crash within the next year increases by %112.6! But because you were alerted of this violation ASAP with Qorta, you can quickly act to fix the behavior before a crash occurs.

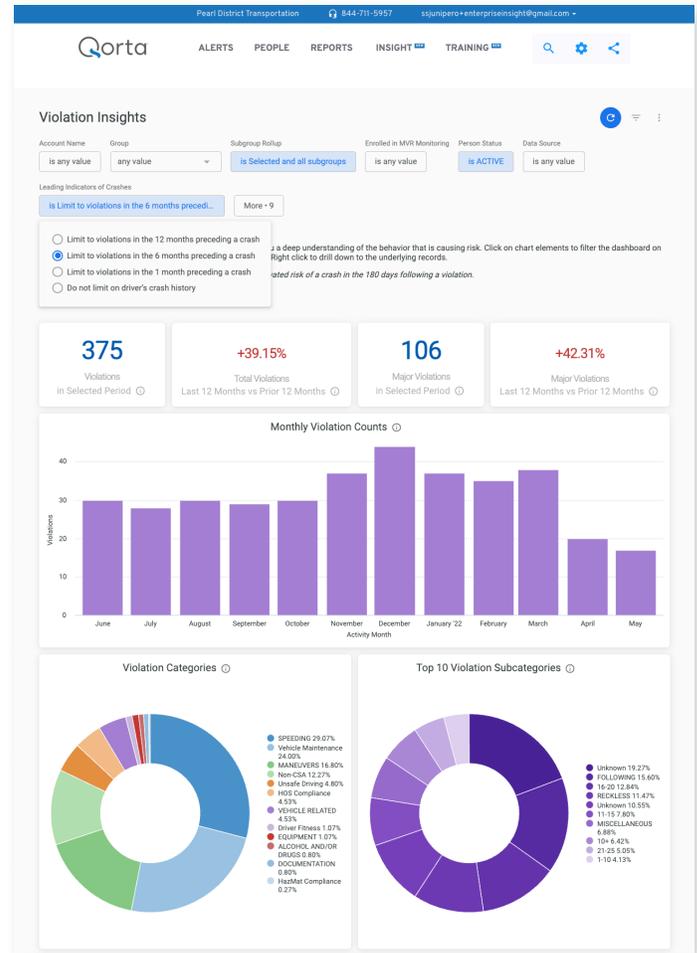

Violation	Increased Probability of a Claim within 12 Months (by %)
Fail To Signal Lane Chg Or Turn	112.6
Speed 21-25 Over Limit In A 60	82.2
FTA/Complete Required Courses	71.8
Show Or Use Improperly Reg Or Title	71.8
Failed To Show DL,Permir/ID	68.2

ESTABLISH AN INTERVENTION STRATEGY

Every mile an at-risk employee drives without intervention puts your company at greater risk. But with the right strategy, you can decrease the likelihood of a costly and potentially fatal crash. With training offered through Qorta, you can enroll drivers in incident-based courses once you're alerted of a violation. With over 300 online training courses to choose from, Qorta works to remediate any risky driving behavior.

STAY ONE STEP AHEAD

Companies that implement ongoing, monthly training for their drivers have 50% less violations than fleets that train twice a year. With Qorta, you can assign frequent training to individuals, specific groups of drivers or company-wide based on any negative driving trends identified via Qorta's advanced reporting dashboard, Qorta Insight.

WITH QORTA, COMPANIES SEE:

- > 22% reduction in violations
- > 14% reduction in crashes
- > 16% reduction in insurance premiums
